

Analyst Programmer (e-Learning/video conferencing system)

We are seeking a well-motivated person with solid system design, development and support background to play a key role in our eLearning solution development. As a programmer in the eLearning Product Team, you will be part of a team responsible for analysing, designing, and developing an eLearning system that includes video conferencing and interactive elements.

The programmer will be responsible for supporting the development of a e-Learning/video conference system and tool to facilitate teaching and learning.

Responsibilities

- Performing requirement analysis, system development, testing, implementation, customization and related support tasks
- Write high standard and reusable code
- Preparation of related technical documents
- Provide 1st tier IT technical support to end users

Requirements:

- Diploma or Bachelor degree holder in computer science or equivalent disciplines
- Good analytic and problem solving skills
- Capable of preparing technical and programming documentation
- Good knowledge in audio/visual equipment is an advantage
- Experience of managing or developing e-learning systems/video-conferencing system will be a plus
- Server-side experience is a plus (e.g., HTML, PHP, NodeJS)

Salary will be commensurate with qualification and experience. Please send your CV to Hong Kong Shue Yan University at tschow@hksyu.edu (Contact person: Dr Jason CHOW) on or before 15th Dec 2020. Personal data collected will be used for recruitment purpose only.
